Introducing Elea

The chair that redefines sitting by seamlessly moving with your body while integrating with your workspace.

It will move you, literally.

Beautifully Crafted

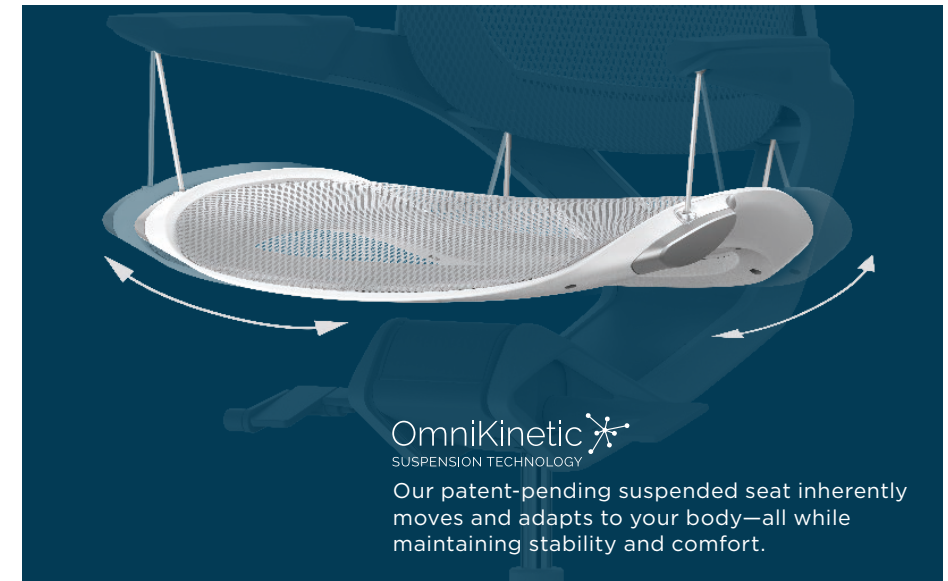

The Elea chair was designed with every line and curve to be both aesthetically distinctive and pleasing — crafted with premium materials.

Designed to Move

Elea challenges stagnation through movement while sitting. Elea moves with you.

Engineered to Suspend

Fellowes created a revolutionary chassis that suspends the seat freely — a concept never before seen on a chair.

Design Movement That Makes You Look

Natural Motion

Suspended seat pan supports and responds to your every move.

Balanced Support

Alloy steel rods and aluminum chassis provide elevated comfort and stability.

Adjustable Tension

Customize the amount of movement for posture and lumbar support.

Air Cushioning

Gas shock enhances suspended comfort with compressed air.

Height Adjustment

Raise and lower your chair to reduce pressure on your legs.

Breathable Mesh

Provide enhanced air flow for airy comfort and reduced fatigue.

Tilt Lock

Locks in 3 positions for flexible seat settings.

Hubless Casters

Roll smoothly on multiple surfaces.

Sit Comfortably.

Move Naturally.

Feel Better.
