

HEALTHCARE INSTITUTIONS BREATHE EASIER WITH FELLOWES

Air purification solutions for staff, patients and visitors

Clean air in healthcare institutions isn't a "nice to have"—it's vital to the daily operations of facilities. Indeed, the stakes are higher in healthcare settings where germs, viruses, bacteria and other pathogens are brought in with constant foot traffic, patients, suppliers and visitors. Couple that with the advent of COVID-19 and a worldwide pandemic, and the prospect of eliminating contaminants becomes decidedly difficult.

Luckily, the complete line of Fellowes commercial-grade air purifiers capture airborne viruses*, allergens and odors, resulting in a healthier environment for caregivers, staff, patients and visitors alike.

Our AeraMax Pro air purifiers can make an immediate and lasting impact in places like waiting areas, conference suites, examination rooms and restroom facilities—virtually anywhere enclosed spaces present indoor air quality challenges.

Discover clean air solutions at trendway.com/aeramax-pro-air-purifiers

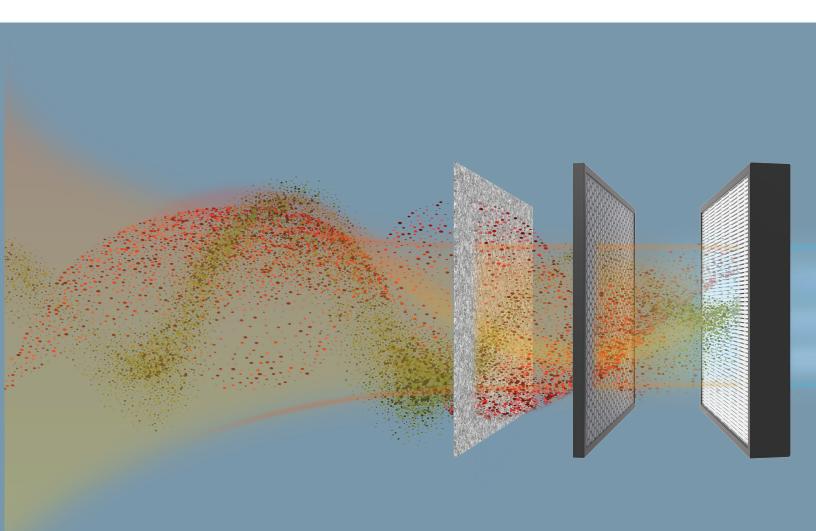

*AeraMax Pro True HEPA filter captures up to 99.97% of particles as small as 0.3 microns, including allergens, such as pollen, dust, pet dander, and smoke. Also proven to reduce 99.97% of influenza A virus within the first 35 minutes of operation in independent laboratory testing.

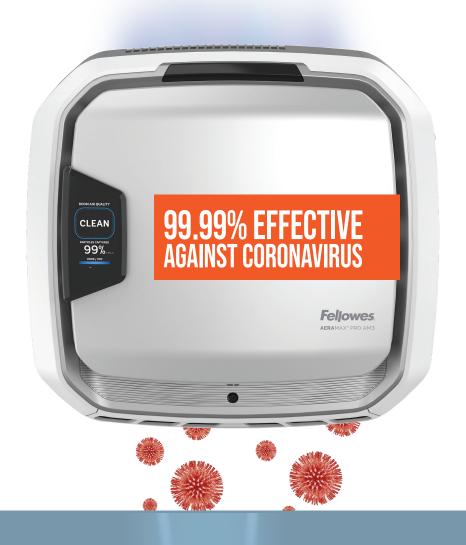

MAXIMUM VIRUS PROTECTION

Fellowes[®] AeraMax[®] Pro Air Purifiers Remove Airborne Contaminants

including coronavirus*, using a combination of smart and integrated technologies - only from Fellowes.

For months, the CDC, ASHRAE, and 'healthy building' scientific advocates have recommended portable air cleaners using HEPA filtration for protection against SARS-Cov-2. *Fellowes AeraMax Pro air purifiers' four-stage True HEPA filtration system proved to be effective in reducing aerosolized airborne concentration of a surrogate Human Coronavirus 229E in a test chamber, reaching 99.99% airborne reduction within one hour of operation.

- *"These latest test results on the Fellowes AeraMax Pro air purifiers provided by an independent third-party accredited (ISO/IEC 17025) laboratory are significant. I continue to be impressed with the findings on the efficacy of this technology/device by Fellowes"
- Dr. Rajiv Sahay, Director of Environmental Diagnostics Laboratory

FELLOWES AIR PURIFIERS AND WAITING ROOMS

Lobbies and waiting rooms in healthcare settings are problematic—they're high-traffic areas where the spread of germs, viruses and bacteria is high. Further complicating things: those who are sick are mingling with those who aren't, as well as with people who already have compromised immune systems.

What's more, surface cleaning can only do so much. To ensure the safety and health of occupants, cleaning the very air is necessary. And we believe the best choice is the ever ready vigilance of Fellowes Air Purifiers.

In fact, Fellowes AeraMax Pro air purifiers feature EnviroSmart 2.0 Technology, where dual laser sensors continually scan rooms, adjusting air purification on-the-fly all day long. And with our PureView Technology, people can see, via a large display, cleaning percentages, so they can rest easy knowing Fellowes Air Purifiers are maximizing clean air in rooms.

Fellowes Air Purifiers offer up to FIVE COMPLETE AIR CHANGES per hour in enclosed spaces—meaning all of the air in a room is exchanged for clean air up to five times every hour. All day long.

FELLOWES AIR PURIFIERS AND EXAM ROOMS

Exam rooms are rife with viruses, pathogens and bacteria, making them difficult to clean and a breeding ground for danger. In fact, according to the Centers for Disease Control, one in 25 patients acquires an infection while in the hospital.

The fact is, surface and hand cleaning can only do so much, particularly against airborne diseases and viruses like COVID-19. Instead, scrubbing the air is essential. Since Fellowes commercial-grade air purifiers use a 4-stage filtration system that removes up to 99.97% of airborne contaminants as small as .3 microns (and is up to 99.99% effective against a surrogate coronavirus*), key placement of purifiers could help in reducing exam room dangers.

*Fellowes AeraMax Pro air purifiers were demonstrated through independent laboratory testing to be effective in reducing aerosolized airborne concentration of a surrogate Human Coronavirus 229E in a test chamber, reaching 99.99% airborne reduction within 1 hour of operation.

FELLOWES AIR PURIFIERS AND RESTROOMS

Restrooms in healthcare facilities pose a unique problem. These close-quarter areas are often shared by both visitor and patient alike—particularly in emergency room areas, where high-traffic patterns might expose people to a variety of airborne viruses. What's more, restrooms are often a breeding ground for odors, requiring constant cleaning.

Luckily, Fellowes Air Purifiers not only remove viruses from the air, but use an active carbon filter to adsorb odors. So, the air is both clean and rid of noxious odors.

FELLOWES AIR PURIFIERS AND MEETING ROOMS

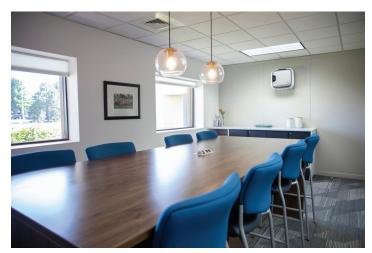

A hallmark of healthcare settings is the interaction of multi-disciplinary care teams—often conducted in conference and meeting rooms. However, various individuals coming from different parts of healthcare institutions may bring unwanted guests with them—viruses, germs, pathogens, allergens and bacteria. Team meetings in conference rooms or designated meeting areas need constant cleaning... the kind of air scrubbing effectiveness found in Fellowes Air Purifiers.

FELLOWES AIR PURIFIERS AND HEALTHCARE BREAK ROOMS

Oftentimes, employee cafeterias and break rooms are havens for germs. What's more, tight quarters and a continually changing group of people using them means discarded food and garbage may result in dank, heavy odors—odors that may linger long after the trash is carted away. That's why it's important to provide Fellowes Air Purifiers in these enclosed spaces, offering employees a pleasant respite during their well-deserved breaks.

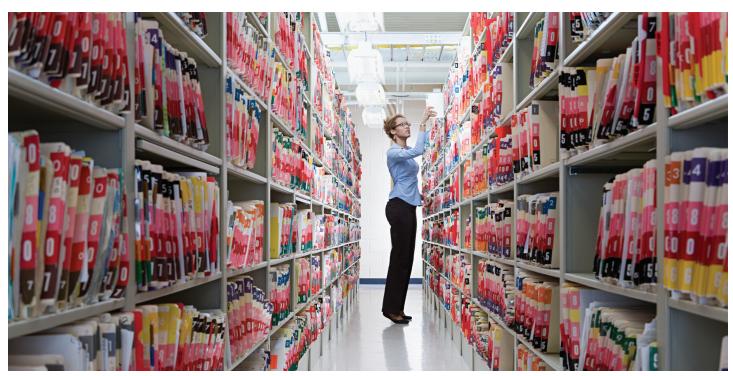

FELLOWES AIR PURIFIERS AND HEALTHCARE FACILITIES MANAGEMENT

Facilities managers have it rough—there are constant streams of patients and visitors to contend with, as well as heightened protocols for environmental safety. That's why Fellowes Air Purifiers are a perfect addition to cleaning regimens.

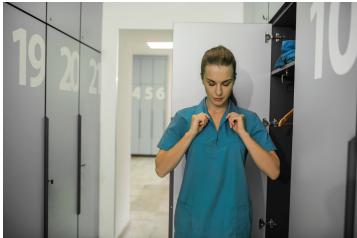

While surface cleaning is an effective spot treatment, a variety of cleaners also emit volatile organic compounds (VOCs)—airborne toxins that in various combinations can affect the health of cleaning workers. And, VOCs can be present in air even when workers aren't cleaning. Carpeting, office equipment and furniture emit VOCs, contaminating indoor air. Good thing Fellowes Air Purifiers remove these contaminants from enclosed spaces, making facilities management easier.

FELLOWES AIR PURIFIERS AND EMPLOYEE LOCKER ROOMS

Healthcare institutions are often staffed 24 hours a day, every day of the year. That's a lot of shift changes—and a lot of personnel changing their clothes throughout the day.

By installing wall-mounted Fellowes AeraMax Pro commercial-grade air purifiers, healthcare locations can effectively remove allergens and offending odors from locker rooms, signaling a fresh start to the day for incoming employees and a healthy goodbye for employees leaving for home.

FELLOWES AIR PURIFIERS ARE SMART

For over a decade Fellowes AeraMax Pro air purifiers have been a leading choice for localized air purification. Fellowes is the only solution that combines True HEPA filtration with EnviroSmart and PureView Technologies.

Our proprietary and patented EnviroSmart technology enables AeraMax Pro commercial-grade air purifiers to continuously monitor your environment and automatically adjust to clean the air, conserve energy and reduce operating costs.

PureView's patented sensor technology and display makes the invisible visible with real time status updates as the air is cleaned. It provides maximum peace of mind that the air you and others breathe is clean.

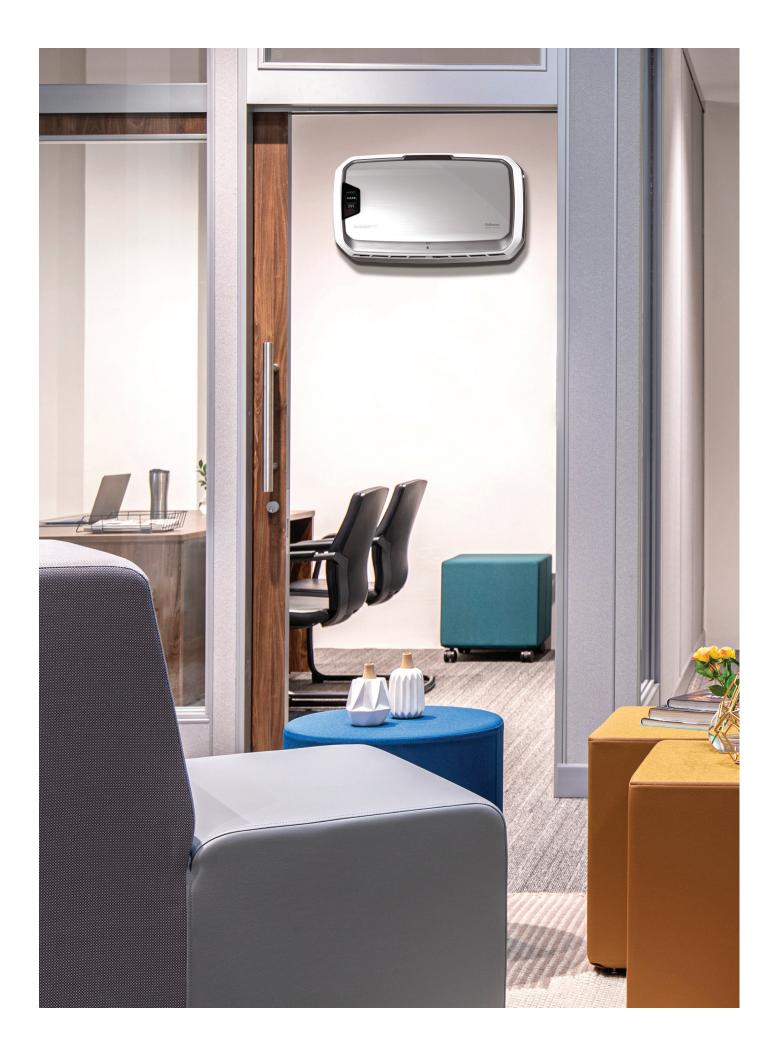

Reliable Commercial Grade Durability

AeraMax Pro commercial-grade air purifiers are built to last, with high-quality components ensuring your unit is reliable, durable, and tamper-proof.

Integrated

A Seamless Addition

AeraMax Pro was designed to seamlessly integrate into your space, whether on the floor, wall-mounted or recessed into the wall. All models are unobtrusive and aesthetically pleasing, so you can provide worry-free air purification wherever it's needed most.

THE AERAMAX PRO LINE UP

AeraMax Pro room size recommendations are based on delivering the recommended 3-5 Air Changes per Hour (ACH).
